

Wholesale Charges 2018/19

Compliance Statements

Published Date: 11 January 2018

1. Introduction

The Board and Audit Committee of Affinity Water Limited (the “Company”) have overseen the preparation of our Wholesale Charges 2018/19 (Wholesale Charges Schedule). Because of the timing of publication of Wholesale Charges and the Wholesale Tariff Document in relation to scheduled meetings of the Board, the Board established a board committee which included executive and independent non-executive directors to act on behalf of the full Board to review the preparation of the Wholesale Charges 2018/19 and the assurance provided by internal and external assurance providers.

The Board committee on behalf of the Board has:

- reviewed the requirements published in “Information Notice 17/09”, setting out Ofwat’s expectations for Wholesale Charges 2018/19;
- considered the requirements of Ofwat’s Wholesale Charging Rules (November 2016);
- considered the actions undertaken by management to prepare the Wholesale Charges 2018/19 to meet these requirements;
- reviewed the processes established to provide assurance that the Company complies with its legal obligations relating to Wholesale Charges 2018/19 and assurance reports provided by internal and external assurance providers;
- assessed the effects the Wholesale Charges 2018/19 will have on water supply licensees supplying customers in Eligible Premises and noted that there are no instances where Wholesale Charges increases will exceed 5%;
- approved the Statement of Significant Changes in Wholesale Charges 2018/19 set out in Section 2 below;
- approved the Board Assurance Statement set out in Section 3 below; and
- approved the Statement of Compliance with the Wholesale Charging Rules set out in Appendix 2.

2. Statement of Significant Changes in Wholesale Charges 2018/19

The Board, through a duly constituted committee, has reviewed and assessed how changes in wholesale tariffs would affect the wholesale charges made to water supply licensees supplying customers in Eligible Premises. The committee has reviewed the Schedule of Primary Wholesale Charge set out at Schedule 1 noting that there are no instances where increases in primary Wholesale Charges will exceed 5%.

Affinity Water accordingly confirms that there are no cases where increases in primary Wholesale Charges to water supply licensees (as a whole or in groups) and (assuming such charges are passed through by water supply licensees to their customers) to customers occupying Eligible Premises (as a whole or in groups) exceed 5% from the previous year, assuming a constant level of consumption.

A small number of new non-primary Wholesale Charges have been introduced and a small number of existing non-primary wholesale charges will increase by more than 5% to reflect the costs of providing those non-primary services. We have assessed the overall wholesale revenue associated with non-primary Wholesale Charges as less than 0.1% of primary Wholesale Charges and are therefore satisfied the overall impact on water supply licensees will be negligible.

3. Board Assurance Statement

The Board of Affinity Water Limited through a duly constituted sub-committee, having made due enquiry of management and having considered reports from internal and external assurance providers confirms, to the best of its knowledge, that:

- (a) the company complies with its legal obligations relating to the Wholesale Charges 2018/19 it has published;
- (b) the Board has assessed the effects of the new charges on water supply licensees (as a whole or in groups) who are retailing wholesale services and (assuming such charges are passed through by water supply licensees to their customers) on customers occupying Eligible Premises (as a whole or in groups) and confirms there are no instances where bill increases for licensees (as a whole or in groups) who are retailing wholesale services and (assuming such charges are passed through by water supply licensees to their customers) on customers occupying Eligible Premises (as a whole or in groups) exceed 5%;
- (c) the company has appropriate systems and processes in place (including up-to-date models and data) to make sure that the information published about its Wholesale Charges 2018/19 is accurate; and
- (d) the company has consulted with relevant stakeholders in a timely and effective manner on its Wholesale Charges 2018/19.

Patrick O'D Bourke

Independent Non-Executive Director
On behalf of the Board

11 January 2018

Appendix 2
Affinity Water Limited
Statement of Compliance with Wholesale Charging Rules

Rule No.	Wholesale Charging Rule	Our Compliance
Rules 1 to 6	Introduction and Interpretation	Not applicable
Publication		
Rule 7	Each water undertaker must publish the Wholesale Charges payable by a water supply licensee for the supply of water to Eligible Premises that are connected to the undertaker's supply system. This includes the Eligible Premises to which a Special Agreement would otherwise apply (although nothing in these rules requires the publication of a customer's name or address).	Sections 5 and 7 of our Wholesale Tariff Document published on our website specifies the Wholesale Charges payable by a water supply licensee for the supply of water to Eligible Premises (including those Eligible Premises to which a Special Agreement would otherwise apply).
Rule 8	Rule not applicable to Affinity Water Limited	Not applicable
Rule 9	Each relevant undertaker must also, as a minimum, publish the Wholesale Charges (or the methodology for calculating such charges where the charges cannot be determined in advance) that would, where relevant, be payable by a water supply or sewerage licensee for: <ul style="list-style-type: none"> (a) the replacement of lead service pipes; (b) the provision and maintenance of fire hydrants; (c) damage to apparatus; (d) the carrying out of inspections to ascertain whether any provision contained in or made or having effect under the Water Industry Act 1991 with respect to any water fittings or with respect to the waste or misuse of water is being or has been contravened; (e) site inspections; (f) the provision and use of standpipes; (g) the testing of meters; and (h) the disconnection of a service pipe (or for otherwise cutting off a supply of water) to 	Sections 6 and 8 of our Wholesale Tariff Document 2018/19 sets out our non-primary wholesale charges applicable to water supply licensees including charges (or the methodology for calculating such charges) for items (a) to (h).

Rule No.	Wholesale Charging Rule	Our Compliance
	any premises and the reconnection of such premises to a water main.	
Rule 10	Wholesale Charges must be published at least eleven weeks before the start of the period for which the charges will be imposed.	Our Wholesale Charges and Wholesale Tariff Document 2018/19 are published on our website on 12 January 2018.
Rule 11	Wholesale Charges must be published on a relevant undertaker's website and in such other manner as the undertaker considers appropriate for the purpose of bringing it to the attention of persons likely to be affected by it.	Our Wholesale Charges and Wholesale Tariff Document 2018/19 are published on our website on 12 January 2018. We provide a website link to our Wholesale Tariff Document to all water supply licensees with whom we have a contract under Section 66D of the Water Industry Act 1991.
Rule 12	Wholesale Charges must be published with such additional information or explanation as is necessary to make clear what services are covered by each charge.	Section 8 of our Wholesale Tariff Document explains what services are covered by each non-primary wholesale charge.
Rule 13	Relevant undertakers whose areas are wholly or mainly in England must determine what types of charges may or may not be imposed and the amount of any charges that may be imposed in accordance with the principle that Wholesale Charges should reflect: (a) fairness and affordability; (b) environmental protection; (c) stability and predictability; and (d) transparency and customer-focused service.	We reflect fairness and affordability by setting charges that comply with the price controls, and by improving the cost reflectivity of our tariffs over time. We achieve environmental protection, principally by charging for water according to measured usage, and by making sure that unmeasured charges on average reflect aggregate unmetered usage. This incentivises more careful water use through charges. Principally we achieve transparency, stability and predictability by adherence to Ofwat's charging rules that ensure we consider mitigating actions if charges are expected to increase by 5% or more and that we give advance notice of any significant changes to charges as well as publishing indicative tariffs in advance.
Principles for determining the amount of charges		
Rule 14	Consistent principles and methodologies must be applied to the calculation of charges for different classes of Eligible Premises, regardless of the services provided.	We promote use of consistent principles and methodologies for setting charges by following a written charges setting procedure that includes for example: <ul style="list-style-type: none"> • Details of relevant internal charging policies

Rule No.	Wholesale Charging Rule	Our Compliance
		<ul style="list-style-type: none"> • How we operate charging methodologies, such as the tariff differential <p>By adhering to the procedure, we promote consistency in our approach to charges as between different classes of Eligible Premises and also consistency year on year.</p>
Rule 15	Charging structures must reflect the long-run costs associated with providing the relevant service.	<p>The majority of our wholesale measured tariffs consist of two-part tariffs with a fixed annual charge and a volumetric rate. Our tariffs are differentiated geographically, reflecting the creation of Affinity Water from 3 predecessor companies. We have aligned fixed charges across our company area, but volumetric rates differ.</p> <p>We set the fixed annual charge to reflect the annualised costs of provision and maintenance of the meter asset and meter space over its asset life, so that fixed charges reflect the use of such assets that are local to and used only by water supply licensees for retailing water services to their end customer. The remaining supply costs are recovered through the volumetric rate. We offer reductions to the standard volumetric rate to reflect the avoided use of network assets by the customers of water supply licensees using larger volumes of water.</p> <p>We assess our large user volumetric rate against the long run marginal cost in our water resources plan to make sure that we are not charging a volumetric rate below our estimate of long run marginal costs.</p> <p>Some Eligible Premises remain on unmeasured charging. We take measures to ensure that wholesale unmeasured tariffs on average are reflective of the volumes of water used by unmeasured users of water in aggregate, principally through our application of a tariff differential. In this way we achieve cost reflective balance between measured and unmeasured charges.</p>
Rule 16	Differences between charges for services provided to Eligible Premises that are larger users of water and sewerage services and charges for services provided to Eligible Premises that are smaller users of water and sewerage services must only be based on cost differences associated with differential use of network assets, differential peaking	We confirm that we have based our mid-user and large-user wholesale tariffs, that are available to customers of water supply licensees that are larger users of water, on our assessments of the cost

Rule No.	Wholesale Charging Rule	Our Compliance
	characteristics, different service levels and/or different service measurement accuracy.	differences associated with the avoided use of network assets by such customers.
Rule 17	Where cost differences associated with differential peaking characteristics are used as a basis for differences between charges for services provided to Eligible Premises that are larger users of water and charges for services provided to Eligible Premises that are smaller users of water, the charges fixed on that basis must be structured on an appropriate peak demand basis.	We do not have different wholesale tariffs for services provided at times of peak demand for water.
Rule 18	Rule not applicable to Affinity Water Limited	Not applicable
Unmetered charges		
Rule 19	No Unmetered Wholesale Charges may be imposed unless the basis on which those charges are fixed or determined is clear and, in the case of Rateable Value Charges, it is clear: (a) which Rating Valuation List charges are fixed or determined by reference to; and (b) if the undertaker uses a different value or other amount to that specified in such a list, the methodology or other basis on which that different value or other amount is calculated.	Our Wholesale Tariff Document specifies in section 4 the Rating Valuation List used to fix charges by reference to rateable value and the methodology used to determine notional rateable values where the value in the Rating Valuation List is not appropriate.
Wastewater charges, Trade effluent and Concessionary drainage charges		
Rules 20 to 24	Rules not applicable to Affinity Water Limited	Not applicable
Special agreements		
Rule 25	Where a Special Agreement would apply to the provision of services to Eligible Premises if the undertaker continued to provide the services, a relevant undertaker must impose on a water supply licensee or, as the case may be, a sewerage licensee only such charges as would enable the licensee to charge for those services at the same rate or rates as would have applied if the Special Agreement had applied.	Our Wholesale Tariff Document sets out in sections 5 and 7 the wholesale tariffs applicable to each of the special agreements that were in place on 1 April 2017 when Affinity Water Limited exited the non-household retail market. Such wholesale charges enable water supply licensees to charge their customers for those services at the same rate or rates as would have applied if Affinity Water Limited had continued to supply the end customer in accordance with the Special Agreement.
Small companies		
Rule 26	Rule not applicable to Affinity Water Limited	Not applicable

Annex: Information requirements		
Assurance statements		
A1	<p>Each undertaker should provide to the Water Services Regulation Authority an assurance statement from its Board of Directors and publish its statement no later than the time of publication of its final Wholesale Charges confirming that:</p> <p>(a) the company complies with its legal obligations relating to the Wholesale Charges it has published;</p> <p>(b) the Board has assessed the effects of the new charges on water supply and sewerage licensees (as a whole or in groups) who are retailing wholesale services and on customers occupying Eligible Premises (as a whole or in groups) and approves the impact assessments and handling strategies developed in instances where bill increases for licensees (as a whole or in groups) who are retailing wholesale services and on customers occupying Eligible Premises (as a whole or in groups) exceed 5%;</p>	<p>Our Board has provided this statement of assurance in section 3 of this publication.</p> <p>Our Wholesale Charges 2018/19 have been calculated in the manner best calculated to comply with the Wholesale Price Control set by Ofwat under Condition B of our instrument of appointment at PR14.</p> <p>Our Wholesale Charges 2018/19 meet the requirements of Condition E of our instrument of appointment (Prohibition on Undue Discrimination and Undue Preference and Information on charges)</p> <p>These statements are supported by the systems and processes and associated assurance described against component (c) of our assurance statement below.</p> <p>It should be noted however it is not possible to provide absolute assurance that all Wholesale Charges are cost-reflective given the historical geographical cross-subsidisation of tariffs for unmetered water supplies.</p> <p>This statement itself sets out how we comply with the Wholesale Charging Rules published by Ofwat in November 2016.</p> <p>Our Legal Team has reviewed the Wholesale Tariff Document against legal and regulatory requirements for Wholesale Charges.</p> <p>We have used our financial model to calculate the level of Wholesale Charges 2018/19 and assess the effect of those charges on water supply licensees and (as a whole or in groups). Having exited the non-household retail market on 1 April 2017, we have assessed the effect of these changes on customers of water supply licensees assuming such charges are</p>

	(d) the company has consulted with relevant stakeholders in a timely and effective manner on its Wholesale Charges; and	We have engaged with the Consumer Council for Water about our Wholesale Charges 2018/19. We shared our Wholesale Tariff Document with CC Water in December 2017. We published our indicative primary Wholesale Charges 2018/19 on the section of our website dedicated to water supply licensees. No comments have been received from water supply licensees on our indicative primary Wholesale Charges.
	(e) where final Wholesale Charges are significantly different from the indicative Wholesale Charges published for the same period, the Board has considered the reasons why those changes occurred and has issued a statement explaining why those changes were not anticipated and/or mitigated. For these purposes, "indicative Wholesale Charges" means the information referred to in A3 below and charges are "significantly different" if a reasonable person would consider the changes to be material.	Not applicable
Indicative charging information		
	No later than six months before publishing its final Wholesale Charges, each undertaker (other than a small company), should if considering making any significant changes to its primary Wholesale Charges publish information that, at a minimum, informs stakeholders of the scope of its proposed changes. For these purposes, changes will be "significant" if a reasonable person would consider them to be material. The information provided does	In July 2017, we published on our website a Statement of Significant Changes in respect of Primary Wholesale Charges for 2018/2019 confirming we considered it unlikely there would be instances where Wholesale bill increases for water supply licensees (as

Annex: Information requirements		
Assurance statements		
	need not be as detailed as that referred to in A3 and A4 below.	a whole or in groups) would exceed 5%.
A3	No later than three months before publishing its final Wholesale Charges, each undertaker (other than a small company) should provide to the Water Services Regulation Authority and publish indicative Wholesale Charges. For these purposes, “indicative Wholesale Charges” are the primary Wholesale Charges that the undertaker reasonably expects to fix for the following period (based on the information available to it at that time).	In September 2017, we published on our website and provided to Ofwat our Indicative Wholesale Access Charges for 2018/19.
A4	<p>No later than three months before publishing its final Wholesale Charges, each undertaker (other than a small company) should, if it intends to make any significant changes to its primary Wholesale Charges, provide to the Water Services Regulation Authority and publish a statement of significant changes. For these purposes:</p> <p>(a) changes to the level of primary Wholesale Charges, or to the methodology for calculating them, will be significant if a reasonable person would consider them to be material; and</p> <p>(b) a statement of significant changes should include:</p> <ul style="list-style-type: none"> (i) what changes are expected; (ii) how water supply and sewerage licensees (as a whole or in groups) and customers occupying Eligible Premises (as a whole or in groups) are likely to be affected; and (iii) the handling strategies that may be adopted by the undertaker or why the undertaker considers that no handling strategies are required. 	In September 2017, we published on our website and provided to Ofwat a statement confirming we had assessed the effects of our indicative Wholesale Charges for 2018/19 on water supply licensees (as a whole or in groups) and confirmed that there are no instances where bill increases were likely to exceed 5%.
A5	<p>Each undertaker (other than a small company) should provide to the Water Services Regulation Authority an assurance statement from its Board of Directors and publish its statement no later than the time of publication of its indicative Wholesale Charges confirming, using the best available information available at that time, that:</p> <p>(a) the company complies with its legal obligations relating to the indicative Wholesale Charges it has published;</p> <p>(b) the Board has assessed the effects of the new charges on water supply and sewerage licensees (as a whole or in groups) who are retailing wholesale services and on customers occupying Eligible Premises (as a whole or in groups) and approves the impact assessments and handling strategies developed in instances where bill increases for licensees (as a whole or in groups) who are retailing wholesale services to eligible customers and on customers occupying Eligible</p>	In September 2017, we published on our website and provided to Ofwat a Board Assurance Statement to this effect.

Annex: Information requirements		
Assurance statements		
	<p>Premises (as a whole or in groups) exceed 5%;</p> <p>(c) the company has appropriate systems and processes in place (including up-to-date models and data) to make sure that the information published about its indicative Wholesale Charges is accurate; and</p> <p>(d) the company has consulted with relevant stakeholders in a timely and effective manner on its indicative Wholesale Charges.</p>
